CONMAS

About Us

200+ | **9.5million** | **12,000m²+**

Skilled employees

2025 Annual sales reach

Manufacturing base Area

Company Profile

CONMAS

Since **2000**, we have been engaged in the production of tableware. By **2012**, after growing tired of factories that could not keep their promises, we established our own injection-molding factory.

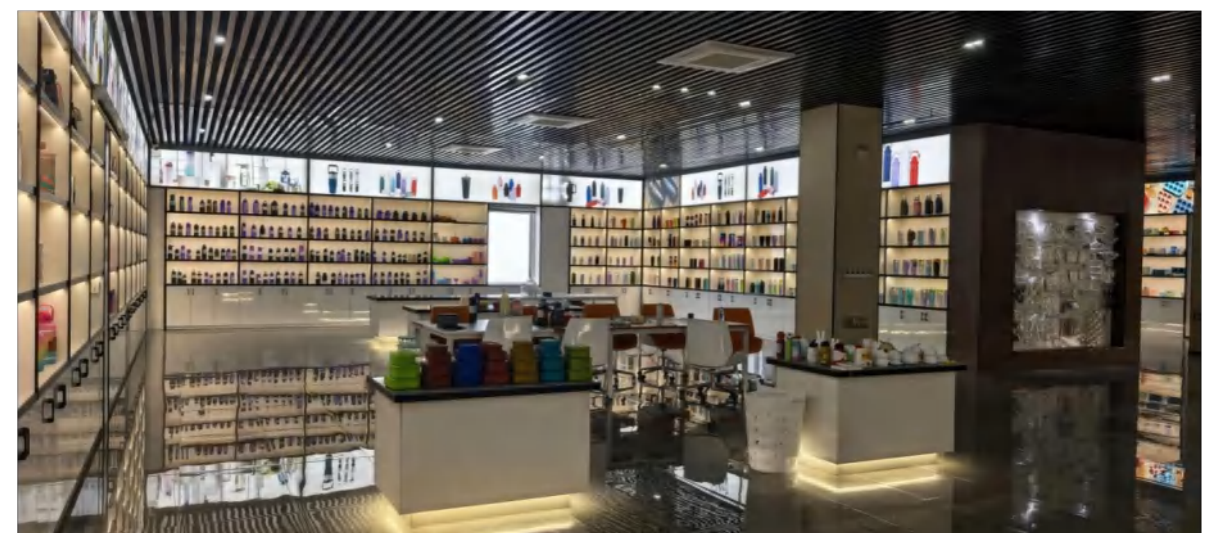

At that time, our goal was to focus on the tableware industry. With the trust of our customers, we have since expanded to become a supplier covering various fields of household items.

Today, we are a **brand supplier with over 200 employees**, integrating business operations, procurement, and production.

We are not an ordinary trading firm or factory. We are a home-goods supplier integrating **design, trade, production, procurement, and quality control**.

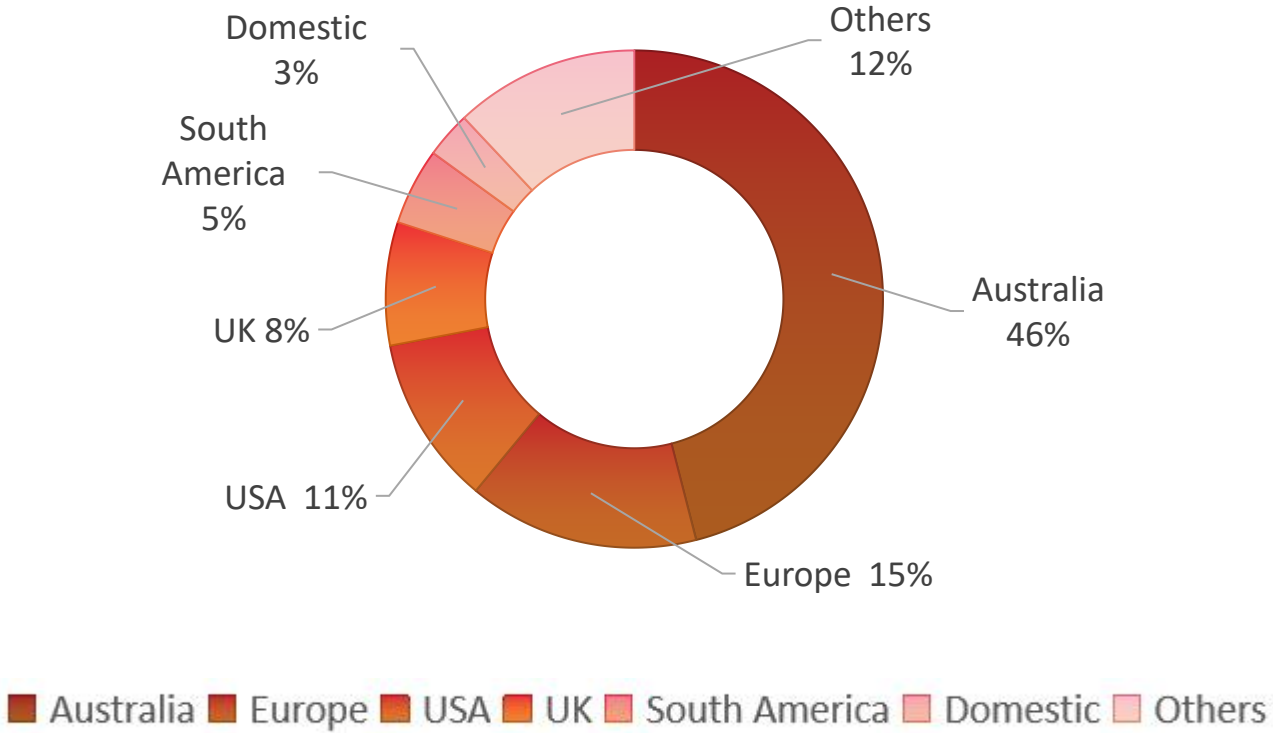

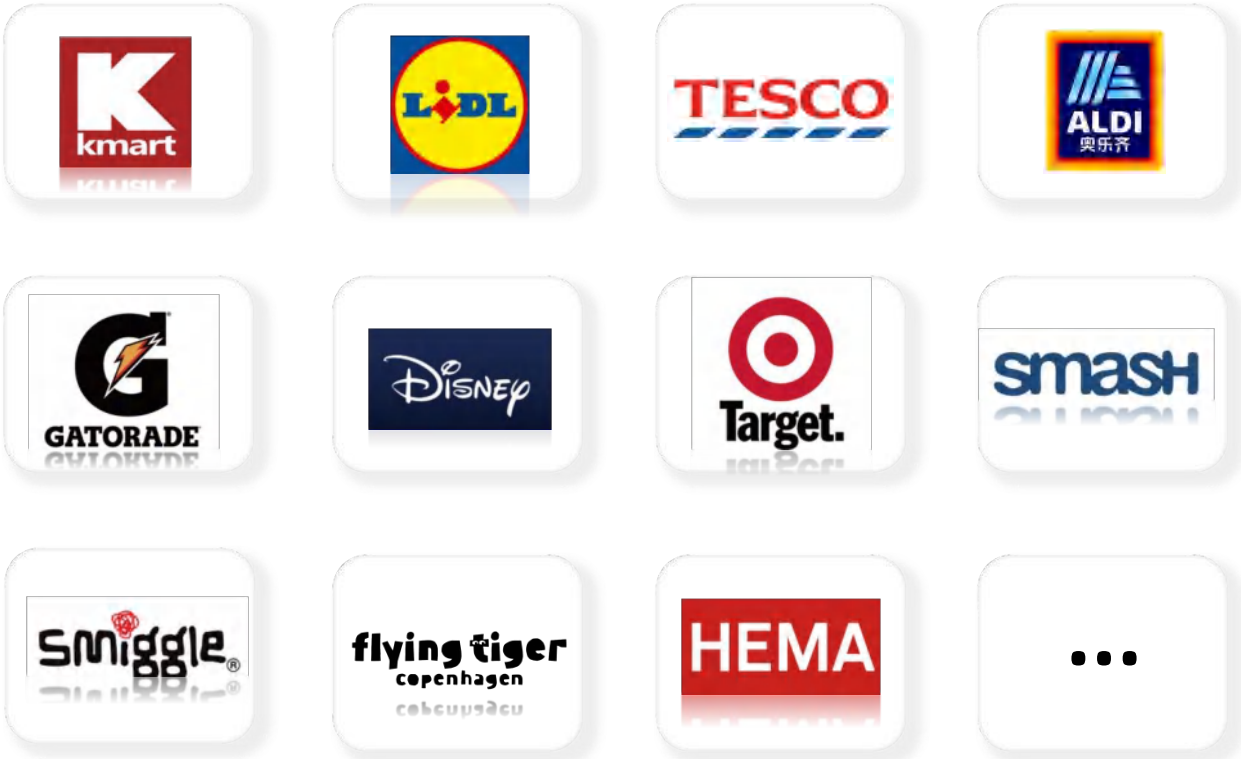

We understand the complete brand procurement-to-production process. We do not just solve buying problems; we provide comprehensive brand product design and production solutions.

We have helped many **international brands and supermarkets** bring challenging and innovative ideas to life.

Our Customers

In the future, we will continue to expand the scope of our cooperation.

Advanced Fully Automated End-to-End Production System

We are equipped with multiple standard fully automated intelligent production lines, integrated with advanced real-time monitoring and data acquisition systems, enabling full-chain visualization management throughout the entire production process.

We possess comprehensive end-to-end production capabilities, covering precision component assembly, automated testing, online quality inspection, and finished product packaging and warehousing. This allows us to efficiently and reliably fulfill large-volume, high-quality production requirements, ensuring precision, efficiency, and superior product quality in every process.
